

4. 石化工業爐通用輕質隔熱不定形耐火材料

Unshaped lightweight heat-insulating refractory products generally used in boilers for petrochemical industry

XQJ 系列不定形耐火材料是本公司開發研製成功的新產品，它具有耐火度高、強度高、體積密度小、導熱系數低等特點。該系列產品廣泛適用於石化、工業各類加熱爐、常減壓爐、硫回收裝置等。

XQJ series of unshaped refractory materials are new products developed by this company, and have the property of high refractoriness, high intensity, low bulk density, and poor thermal conductivity. They are broadly used in heaters, ambient temperature pressure-reducing furnaces, and sulphur-reusing facilities.

輕質澆注料 Lightweight casting material
